

# Software at Geneseo

Geneseo has negotiated strategic licensing agreements with software vendors to make their products available to student, faculty, and staff-owned personal computers.

Each software package has slightly different license specifications; please note what types of usage are allowed. Most download links require entering your Geneseo username and password. Some software may also require the use of [Virtual Private Networking \(VPN\)](#) to connect to campus license servers.

For installation on campus owned computers, please contact the [CIT HelpDesk](#) at 585-245-5588.
